For the LArSoft school planning team

31st October 2024

What have we learned?

- **A lot**
- The aim was to give you all a crash course on ART/LArSoft so that coding doesn't get in the way of physics
- The LArSoft journey doesn't end here
- We are still here to help; you can find most of us frequenting the experiment slacks
 - **DUNE:** dunescience.slack.com
 - **SBN:** shortbaseline.slack.com <- contact me for access
 - **MicroBooNE:** microboone.slack.com
 - **Pandora:** pandorapfa.slack.com <- contact me for access

Last logistic bits

- We will keep the workshop slack open
 - We will start losing messages that are 90 days old
 - If you need help, you can find us on the various experiment slacks
- Please copy any files/scripts/root files/other stuff from the server to a safe place as the server will be spun down
 - It will be spun down very soon (within a couple of weeks)
- We have made a short survey and we would **GREATLY** appreciate you filling it out
 - The survey feedback is the primary way that we found out how we did
 - It really helps to make the workshop better
 - <https://forms.gle/9cPu2LMp2Q6Ttzpe9>
 - We will also email out the form
- There's no lunch provided today
