

2025 UK LArSoft School Closeout

Dom Brailsford
Andrzej Szelc
For the LArSoft school planning team

30th October 2025

What have we learned?

- A lot
- The aim was to give you all a crash course on ART/LArSoft so that coding doesn't get in the way of physics
- The LArSoft journey doesn't end here
- We are still here to help; you can find most of us frequenting the experiment slacks
 - **DUNE**: <u>dunescience.slack.com</u>
 - SBN: shortbaseline.slack.com
 - MicroBooNE: microboone.slack.com
 - Pandora: pandorapfa.slack.com <- contact me for access

Last logistic bits

- We will keep the workshop slack open
 - We will start losing messages that are 90 days old
 - If you need help, you can find us on the various experiment slacks
- Please copy any files/scripts/root files/other stuff from the server to a safe place as the server will be spun down
 - It will be spun down very soon (within a couple of weeks)
- We will send out a short survey and we would GREATLY appreciate you filling it out
 - The survey feedback is the primary way that we found out how we did
 - It really helps to make the workshop better
 - We will also email out the form
- There's no lunch provided today

The Thanks

- The LArSoft school does not work without the incredible amount of work from many people
- Thank you to the lecturers/tutors
 - M. Nebot-Guinot, R. Coackley, A. Navrer-Agasson, J. Bateman, P. Green, A. Szelc, A. Chappell, M. Osbiston, I. Mawby, A. Wilkinson, H. Lay, L. Whitehead
- Thank you to the local organising committee
 - A. Szelc, M. Nebot-Guinot, G. Vitti Stenico
- Thank you to **R. Currie**, our local server/guacamole overlord
- Thank you to J. Marshall and L. Wootton (DUNE UK RS&DC project) for providing funding for catering/coffees
- Thanks to **Thelma** and **Angela** for the event organisation and group dinner
- Thank you A. Szelc for being the co-organiser
