2026 UK LArSoft School Closeout

Dom Brailsford
Andrzej Szelc
For the LArSoft school planning team

29th October 2026

Sorry that the weather sucked

What have we learned?

- **A lot**
- The aim was to give you all a crash course on ART/LArSoft so that coding doesn’t get in the way of physics
- The LArSoft journey doesn’t end here
- We are still here to help; you can find most of us frequenting the experiment slacks
  - **DUNE**: dunescience.slack.com
  - **SBN**: shortbaseline.slack.com
  - **MicroBooNE**: microboone.slack.com
  - **Pandora**: pandorapfa.slack.com <- contact me for access

Last logistic bits

- We will keep the workshop slack open
  - We will start losing messages that are 90 days old
  - If you need help, you can find us on the various experiment slacks

- Please copy any files/scripts/root files/other stuff from the server to a safe place as the server will be spun down
  - It will be spun down very soon (within a couple of weeks)

- We have a short survey for the workshop, and we would **GREATLY** appreciate you filling it out
  - The survey feedback is the primary way that we found out how we did
  - It really helps to make the workshop better
  - Here is the link: link to form

The Thanks

- The LArSoft school does not work without the incredible amount of work from many people

- Thank you to the lecturers/tutors
  - **M. Nebot-Guinot, L. Kotsiopoulou, A. Lister, M. Handley, P. Green, V. Basque, A. Chappell, A. Wilkinson, I. Mawby, A. Beever, T. Jones, L. Whitehead**

- Thank you to the local organising committee
  - **A. Szelc, M. Nebot-Guinot, V. Basque, L. Kotsiopoulou**

- Thank you to **P. Love**, for setting up/managing the guacamole server

- Thank you to **J. Marshall and L. Wootton (DUNE UK RS&DC project)** for providing funding for catering/coffees

- Thanks to **Thelma** and **Angela** for the event organisation and group dinner

- Thank you **A. Szelc** for being the co-organiser

Thank you to all of you for coming!
